Part of the requirements not implemented in the project:

1) Budget and funding:

The budget of the college programming club changes every semester so updating the budget page manually every semester does not make sense, and also it is also difficult to change the budget data every semester.

2) Volunteer hours tracking:

The programming club is not tracking the data of volunteer hours because programming club members are passionate about their work in the programming club. Our institute programming club does not have any kind of volunteer hour data so it is difficult to track that data.
